

## Center for Climate Protection College Internship Application

The Center for Climate Protection's (CCP) ECO<sub>2</sub>shool Program is looking for creative students as interns for the 2018-19 school year. As an intern, you would spend a total of 20-40 hours working with staff on a service learning project related to transportation sustainability, and climate change.

### Opportunities Include:

- Social media
- Blog writing/Editing
- Video making
- Creative arts projects
- Transportation engineering projects

### Job Responsibilities

- Work with program staff to learn key content
- Work with staff and mentors to develop a meaningful climate service-learning project
- Other jobs as determined

### Desired Qualities

- Organized: Completes task on time and has the ability to work effectively and efficiently
- Team player: Makes a positive contribution
- Flexible: Willing to try new things, and explore new possibilities
- Good listener and a quick learner: Uses good judgment and helps resolve problems

### Why Become an Intern?

Internships are a great addition to a job application, resume, or college application. If you have a community service/class obligations, we can work with your school's requirements. You will learn new skills, contribute something big to your community, and have fun while doing it! Past participants have won awards and scholarships for their work with us.

### How to Apply

If you are interested in becoming an intern send a letter of interest to [eco2school@climateprotection.org](mailto:eco2school@climateprotection.org) with the following information:

1. Your name, college, year in school, and major/minor(s)
2. Contact information including email address and phone number
3. Why are you interested in an internship with the Center for Climate Protection?
4. What skills and experience will you bring?

To apply or ask questions about this position, contact us at [eco2school@climateprotection.org](mailto:eco2school@climateprotection.org)

*The Center for Climate Protection's ECO<sub>2</sub>school program inspires young people to take action for immediate greenhouse gas emissions reductions while promoting long-term personal and community environmental action.*
