

Center for Climate Protection Internship Application

The Center for Climate Protection's (CCP) ECO2school Program is looking for creative students as interns for 2019 summer. As an intern, you would spend a total of 5-10 hours a week working with staff on a variety of multi-media and outreach projects related to youth leadership, transportation sustainability, and climate change. As a college student you will have the opportunity to work with CCP staff to design a project based on your course of study, abilities, interests, and need.

Opportunities Include:

- Policy
- Communications
- Research
- Speed and scale solutions
- Energy and Transportation projects

Job Responsibilities

- Work with program staff to learn key content
- Work with staff and mentors to develop a meaningful climate service-learning project
- Other jobs as determined

Desired Qualities

- Organized: Completes task on time and has the ability to work effectively and efficiently
- Team player: Makes a positive contribution
- Flexible: Willing to try new things, and explore new possibilities
- Good listener and a quick learner: Uses good judgment and helps resolve problems

Why Become an Intern?

Internships are a great addition to a job application, or resume. If you have a community service requirement to complete, we can work with you on requirements. You will learn new skills, contribute something big to your community, and have fun while doing it! Past participants have won awards and scholarships for their work with us.

How to Apply

If you are interested in becoming an intern send us a copy of your resume along with a letter of interest to eco2school@climateprotection.org with the following information:

1. Your name, major and intended graduation.
2. Contact information including email address and phone number
3. Why are you interested in an internship with the Center for Climate Protection?
4. What skills and experience will you bring?

To apply or ask questions about this position, contact us at eco2school@climateprotection.org. This is a stipend position.

The Center for Climate Protection's ECO2school program inspires young people to take action for immediate greenhouse gas emissions reductions while promoting long-term personal and community environmental action.
