How much CO₂ can you save by walking or riding your bike to school one day a week?

The Power of Collective Action

Choose active and shared transportation to lower your commute carbon footprint.

Walking one mile takes 15-20 minutes.

Biking one mile takes 7 minutes.

Walking and biking to school addresses three tiers of health.

Personal Health

The USDA recommends teens get 1 hour of physical activity a day.

Walking to and from school meets 2/3 of that requirement.

Community Health

Getting students to school makes up 15-20 percent of morning traffic

Walking and biking alleviates traffic congestion, and improves air quality.

Environmental Health

60 percent of Sonoma County's carbon footprint comes from transportation.

Walking and biking to school one day a week saves 100 pounds of carbon per school year.
